Edith Matilde Thomas
O. B. of Mystical Verse

392

All around him Palmas lies
Who hath spirit-gifted eyes,
Who his happy sight can rent
To the great & the minute.

Palmes a char-ly in spirit

XX Extrapol. 6/6

Sc News 2. p 7/8

- (heaviest nuclei of uneconomical size)
- ① Hahn was building a transuranic element - heavier than uranium - (by bombarding uranium with neutrons) when he discovered nuclear fission.
- ② World at same time was divided into 2 immense war camps.
- 2 results of Extrapol.
- ③ Great state institutions - business monopolies, inflation - revolution.
- Synthesis of v. light molecules.

III 7

The whole & its parts : individuality

- 1 Hierarchy contains pseudo-monadic stages. Arbitrariness.
- 2 What is individual then? Independence, definition, indivisibility
mere aggregation. No true individuality.
- 3 Tests of wholeness: (a) character of whole - independent, defined
(b) " " parts - specialised, dependent.
- 4 Dependence of parts makes for independence of whole.

~~Topic~~ 'Office' procedure: the proper channels

1. Was everything done through me? Government office procedure is quite simple.
2. No. Direct dealings in earlier office relations. I...
Then still go on.
3. Instances. Incident. Gravity etc. Office has grown by addition in the centre, who has not taken all over.
4. But it is then to be taken over. Office goes on if I am an idiot. I am just by-passed.
5. Every level is one of 4 closely connected aspects
(1) Level (2) its TV counterpart (3) Whole (4) S.C. the
Other levels are more or less incidental
(5) Source

Plants' Roots in the Air

(256) Plant's material almost all from air - from carbon dioxide. Roots find water & small quantities of salts only. Roots are quite secondary & are merely appendages which, sent out to find food naturally stays where it is. * If the air were opaque & the soil transparent --- we should have a juster vision of functions of plant roots & tops.

development of the planet
The ~~life of Earth~~ is centrifugal: ~~its history~~ beginning with
~~late of~~ ^{molecules in the earth, it goes on to} ~~primitive~~ cells in the water,
advanced animals on the land, & men in the
air. But the mistake is not to see all four
together as a single living function. We treat E's
organs piecemeal, like a physician treats
symptoms & disjunct parts instead of the whole man.

knows each quiplet in turn
