## Quarterly Activities Report for the three months ended 31 March 2014

### Introduction

Traka Resources Ltd (ASX: TKL) is a Perth based exploration company with its primary exploration assets held in the Musgrave and Ravensthorpe Project areas of Western Australia (Figure 1).

Figure 1: Location plan of Traka's Projects in Western Australia

## The Musgrave Project

The Company has focused over the past few years on its Musgrave Project. Traka has a large position in the Musgraves with interests in 30 exploration licences, of which 5 are granted, extending over about 9,000 square kilometres (Figure 2). The Company's wholly owned interests extend over 22 exploration licences. A further 5 tenements are the subject of a joint venture with Western Areas Limited ("WSA") and 3 others are subject to a joint venture with Anglo American Exploration (Australia) Pty Ltd ("AAE").

WSA and AAE manage their respective joint ventures and each can earn a majority equity position of between 70% and 80% by meeting expenditure commitments and free-carrying Traka's retained equity of between 20% and 30% through to completion of a Bankable Feasibility Study.

Traka's planned exploration program for 2014 necessitated additional successful negotiation of access into the new tenement areas around Latitude Hill and Tollu. Heritage surveys have been undertaken and negotiations are underway but at this point in time no agreement has been reached.

### **Western Areas Limited Joint Venture:**

Exploration work completed in the March Quarter period is summarised in the following extract provided by WSA:-

*Exploration activities during the March quarter included the completion of the RC drilling program (8 holes for a total of 1,842m) and subsequent down-hole electro-magnetic (DHEM) and fixed loop electro-magnetic (FLEM) surveys. Single holes were completed to test the higher priority EM targets identified from the previous ground EM surveys (Figure 3). The DHEM was used to confirm the effectiveness of the drilling, and a number of small FLEM surveys were completed to better constrain the geophysical modelling.*

*Four holes were completed at the Samaria Prospect, testing a cluster of MLEM conductors in the SW of the prospect where a number of magnetic anomalies were interpreted to surround the central Samaria intrusion. Despite all drill holes encountering favourable geology (intrusive gabbro and gabbro-noritic lithologies), the drilling failed to intersect any high-grade, massive nickel and copper mineralisation.*

*Drilling at the Atlas prospect tested a series of highly conductive EM anomalies that were interpreted to lie conformably at the base of an interpreted troctolite, as well as within the layered intrusive pile of the Jameson intrusion. No high-grade, massive nickel and copper mineralisation was returned from the drilling, however chalcopyrite mineralisation (+/- magnetite) was returned from a number of holes including 6m @ 0.16% Cu from 52m in WMRC0004. Initial indications are that this mineralisation is similar in style and metal tenor to that of the Succoth deposit within the adjacent BHPB tenements. Further work, including petrology, is now underway to confirm this association.*

*Whilst the drilling effectively tested the EM targets and confirmed that no high-grade, massive sulphide bodies exist in the surveyed areas, the presence of significant volumes of copper sulphide mineralisation has implications for the discovery of further low-grade, Succoth style deposits within the tenement package. Further work is currently being undertaken to assess the prospectivity of the areas with the project tenure outside of the recently completed ground EM surveys.*

### *Anglo American Exploration (Australia) Pty Ltd Joint Venture*

AAE's remaining interests in the Musgraves are now concentrated in the south-eastern Latitude Hill area (Figure 2). A number of strong Spectrem EM targets have been identified in this area.

### **The Ravensthorpe Project**

Traka's interests in the Ravensthorpe Project are entirely farmed-out to Silver Lake Resources Limited, subject to the terms of 4 separate Option Agreements, each relating to a separate part of the Project. SLR have an initial 12 month Option Period after which time they may choose to retain an interest and/or return separate option areas subject to various terms (Figure 4).

There was no updated exploration information available from SLR for this joint venture at the time of writing this report.

**Figure 4: Location plan of the Ravensthorpe Project**

***Sirdar Joint Venture***

(Galaxy 80%; Traka free carried)

No updated information is available for this joint venture.

## **Corporate**

Traka has embarked on a project acquisition program to expand the Company's exploration interests into new areas. All of the Company's active existing interests are currently funded and managed by our joint venture partners. Although this shields Traka from expenditure commitments in a period of very depressed market conditions, the Company also believes that opportunities exist to acquire a new project and increase the level of exploration activity within the company.

	<b>Net increase (decrease) in cash held</b>	(66)	1,016
1.20	Cash at beginning of quarter/year to date	1,129	47
1.21	Exchange rate adjustments to item 1.20	-	-
1.22	<b>Cash at end of quarter</b>	1,063	1,063

### Payments to directors of the entity, associates of the directors, related entities of the entity and associates of the related entities

		Current quarter \$A'000
1.23	Aggregate amount of payments to the parties included in item 1.2	86
1.24	Aggregate amount of loans to the parties included in item 1.10	-

#### 1.25 Explanation necessary for an understanding of the transactions

1.2	The net cash inflows YTD in respect of Exploration arise as a result of receipts of expenditure recovered from JV partners of approximately \$336,000 of which \$4,400 was recovered in Quarter 3.
1.7	Other Receipts YTD principally consist of option payments received.
1.8	During Qtr 1 the Company paid \$250,000 to acquire an exploration tenement and the payment was recovered from a JV partner – resulting in no net cash outlay on investments YTD.
1.14	Current quarter cash outflow relates to balance of costs of prior quarter Share Purchase Plan.

### Non-cash financing and investing activities

- 2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

--

+ See chapter 19 for defined terms.

- 2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

--	--

**Financing facilities available**

*Add notes as necessary for an understanding of the position.*

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
