

VITAL ECO SUPER FLOC

H2flow
Hire

Vital Chemical provides water treatment solutions through its extensive range of flocculant agents for suspended solids in aqueous mediums. From site assessment to flocculant applications and dosing systems, effective water treatment can easily be achieved.

Vital Eco Super Floc is a water-soluble bio-polymer flocculant utilised in water and wastewater treatment applications.

Vital Eco Super Floc consists of a bio-polymer technology which flocculates suspended and dissolved particulate matter through its action of ionic binding.

- Advanced pH stability
- Biodegradable – organic composition
- Economical – low dosage rates
- Single Dose System – for ease of use
- Wide ranging applications
- Suspended solid removal across a broad range of sediment types
- Supports long term environmental outcomes

Vital Chemical's industry partner H2flow Hire provides turn-key applications of Vital Bon-Matt and water treatment products.

Vital Chemical provides products which enable our clients to adapt best practice technologies to mitigate the environmental impact of mining and civil developments. Vital Chemical's products are designed for ease of use without the need for specialised equipment.

FAST, EFFECTIVE AND
ENVIRONMENTALLY SUSTAINABLE
